Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20 and 23, drawn to a pharmaceutical formulation and syringe or vial, comprising fulvestrant, a pharmaceutically acceptable alcohol, a pharmaceutically-acceptable non-aqueous ester solvent miscible in a ricinoleate vehicle, and a ricinoleate vehicle, classified in Class 514, Subclass 169.
- II. Claims 21-22, drawn to a method of treating a benign or malignant disease of the breast or reproductive tract in a human, comprising administering , classified in Class 514, Subclass 169.

Inventions of Group I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of using the product as claimed to treat benign or malignant diseases of the breast or reproductive tract in a human can be practiced with a materially different product, such as fulvestrant, for example, in a peanut oil vehicle, alone.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Election of Species

In addition, if applicant elects Group II above, Claim 21 is generic to a plurality of disease states or conditions comprising benign or malignant diseases of the breast or reproductive tract. Applicants are required to elect an individual benign or malignant disease of the breast or reproductive tract to be treated in a mammal, e.g., breast cancer, benign prostatic hyperplasia, genital warts, etc., as a specie under 35 U.S.C. 121 to which the claims shall be restricted if no generic claim is finally held to be allowable, even through this requirement is traversed.

Claim 21 is generic to a plurality of disclosed patentably distinct species comprising benign or malignant diseases of the breast or reproductive tract. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

The search for all species of all benign or malignant diseases of the breast or reproductive tract presents an undue burden on the office due to their separate and distinct fields of search. Note that the search is not limited to the patent files. Claim 21 is drawn to the treatment of many benign or malignant diseases of the breast or reproductive tract, for example, breast cancer, benign prostatic hyperplasia, and genital warts. The search field for treatment of breast cancer, benign prostatic hyperplasia, and

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Donald Bird on July 25, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl Stiller whose telephone number is 703-306-3219. The examiner can normally be reached Monday through Friday, 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minna Moezie can be reached at 703-308-4612. The fax phone number for the organization where this application or proceeding is assigned is 703-308-4556 for regular communications.
